

Science Innovation & Entrepreneurship for Imperative Transformation: Envisioning Africa's Future with Science and Technology

The World Forum for Science-Innovation and Entrepreneurship (WFSIE) is more than a conference—it's a global movement. Founded in 2024 by Prof. Amal Amin (Professor of Polymers/Nanotechnology, National Research Centre, Egypt), WFSIE brings together scientists, innovators, educators, and changemakers to shape the future of our planet through human-centered science, inclusive entrepreneurship, and ethical innovation.

Kenyatta University, Nairobi, Kenya

December 1–3

WFSIE is powered by Science for Humanity – Global Society, Women in Science Without Borders, and Traces & Dreams AB, in partnership with Kenyatta University. These organizations share a belief: the world needs collaborative spaces where ethics, creativity, and knowledge come together to create sustainable futures.

Steering Committee

*Prof. Amal Amin, Founder, WFSIE – Honorary Founding Chair
Dr. Wycliffe Ong'eta Mose, Kenyatta University – WFSIE Co-chair
Dott. Nerina Finetto, WFSIE Strategic Director*

Organizing Committee

*Dr. Wycliffe Ong'eta Mose (Kenya)
Faith Mwangangi (Kenya)
Pratheebhan (Malaysia)
Franklin Tchakounte (Cameroon)*

TRACES DREAMS

Welcome to WFSIE – Kenya 2025

Our Vision

We envision a world where science and entrepreneurship uplift humanity—where innovation heals systems, and every person is empowered to co-create knowledge and solutions.

In this future, entrepreneurship is a force for justice, and science walks alongside the humanities to nurture life, dignity, and imagination.

Our Mission

WFSIE connects research, technology, and entrepreneurship with lived experiences and community values. We aim to:

- Redefine science as radically human and locally grounded
- Create platforms for visibility, co-design, and co-production
- Support equitable partnerships, especially across the Global South
- Champion inclusive, ethics-driven innovation

WFSIE is a living ecosystem of knowledge creators, system disruptors, and storytellers imagining a better tomorrow.

Why Africa, Why Now?

Africa is a continent of innovation, resilience, and untapped potential. Yet, systemic barriers often prevent ideas from becoming impact.

WFSIE–Kenya 2025 is a declaration: Africa is not a recipient—it is a co-author of global innovation.

This first edition, hosted at Kenyatta University, will spotlight African-led science, entrepreneurship, and innovation, bridging local realities with global opportunities. The forum supports the transformation of Africa's STI landscape through:

- Capacity building & mentorship
- Inclusive policy dialogues
- Market-aligned research commercialization
- Platforms for youth and women leadership
- Empowerment through local & indigenous knowledge systems
